

# Video Notes: (Makeup Class)

PAGE \_\_\_\_\_

DATE \_\_\_\_\_

- The words people thought of about the AI made me think from these perspectives such as how risky it is, and other emotions such as Curiosity and Excitement. The relation between AI and ~~the person~~ what means for people personally, economically, humanity, and society.
- How ~~teaching~~<sup>AI</sup> impacts the ~~AI~~<sup>teaching</sup> as well as as it does using it leads to perligism.

The diversity of opinions and the different majors shows for me how AI is connecting all of these mindsets and majors.

- the impact of AI on the way of education, and how learn as well as the communication.

transparency (with everyone specially students)

- graduating ethically

- AI's are strong in english more than Arabic.

- being able to offer what exactly people need

Accept, adapt, and deal with such an opportunity.

- you have to do something to get something  
tension between leaving and AI.

- Applying AI on different levels of education.

- Relating Phaedrus Plato (about technology)

↓ make student lazy

- AI is opportunity → look at understanding of how it's useful

Getting audiences (opinion)

- Broadly accepted after few years and applied.

- Accept that it is a good system to use.

- How could AI help professors as well (such as feedbacks)

- It is an opportunity and never think that it would damage us.

- Start talking about AI ethics (speaking up)

- developing cognitive abilities

- Controlling Society

- Calculators have huge impact (save time)

- higher order function.
